

YOGESH CHAUHAN

Software Engineer · Full-Stack (React · Node.js · TypeScript)

chauhanযোগেশ950@gmail.com | +91 78387 80046 | Delhi, India | yogeshchauhan.dev | LinkedIn | GitHub

SUMMARY

Full-stack software engineer with **2 years** of experience building and scaling production web applications in **TypeScript** across the **MERN/MEVN** stack. Primary frontend contributor and a top backend contributor on a multi-tenant HR platform, where I **led a backend refactoring & performance initiative that raised the codebase's documented quality score from 4.5 to 8.6/10** and **cut per-request authentication overhead ~4x**. Comfortable owning features end-to-end — from database schema and APIs to React UI — with a focus on performance, clean architecture, and maintainability.

WORK EXPERIENCE

24 months

Work Companion (WoCo) — Software Engineer

Oct 2024 – Present · Delhi, India

Tech: TypeScript, React 19, Redux Toolkit, MUI, Node.js, Express, MongoDB, Redis, MySQL, AWS S3 · Product: PMS (Performance Management)

- Core engineer on **WoCo PMS**, a **multi-tenant HR performance-management platform** (React SPA + Node/TypeScript API); **#1 frontend contributor** and a top backend contributor across 800+ commits.
- Led **end-to-end frontend development** — integrated **100+ APIs** across modules, implemented **Redux Toolkit** state management, and built **200+ reusable MUI components** for a consistent, faster-to-develop UI.
- Improved load and perceived performance with **route-level code-splitting** (React.lazy + Suspense) and **28 skeleton loaders**; designed a **typed API service layer** for consistent error handling.
- Led a **backend refactoring & performance initiative** that raised the codebase's documented quality score **4.5 → 8.6 / 10** — introducing a layered service architecture (26 services, 13 pipelines), Redis caching, and structured logging.
- Cut **authenticated-request overhead ~145ms → ~35ms (~4x faster)** via a fail-open Redis cache; added **44 MongoDB indexes** for 100–500x faster indexed queries; collapsed N+1 hotspots (~120 → ~6 queries on a key path). *Before/after analysis estimated ~4–5x backend throughput.*
- Built an **AI-powered question generator UI** (OpenAI gpt-4.1-mini) for KPI/KRA, 360° feedback, competency & PLI questions, plus a **bulk Excel-upload flow** — cutting question setup from a manual pass to a generate/upload-then-review flow.
- Hardened security & reliability: closed **10 SQL-injection points**, moved 5 hardcoded secrets to env, fixed **25+ critical bugs** and 35+ frontend/UI issues, and removed **~6,700 lines** of dead code; migrated CI to gate on type-check + build. Added a **Vitest test suite** + **ErrorBoundary**.

Agami Technologies — Software Specialist

Jun 2024 – Oct 2024

Tech: MEVN (MongoDB, Express, Vue.js, Node.js), Socket.io, OpenAI

- Resolved **398+ bugs** across modules through effective debugging and close collaboration with QA and product teams.
- Delivered **7+ core features** and contributed to **24+ system improvements**, optimizing UI behavior, usability, and backend efficiency.
- Integrated **OpenAI** into the **BeGenieus** platform — direct GPT chat for instant answers, AI-powered image generation, and AI-driven features across multiple modules for customized responses.

PROJECTS

Candor — AI-coached anonymous-feedback platform

candor-cyan.vercel.app · GitHub

Next.js 14 (App Router), TypeScript, MongoDB, NextAuth (Credentials + Google OAuth), Google Gemini (Vercel AI SDK), Upstash Redis, Resend, Zod, Vitest + Playwright

-  **AI growth loop**: Gemini-powered **safety moderation** of incoming messages + an **AI Feedback Coach** that clusters the inbox into themes and drafts a **trackable growth plan** (To Do → In Progress → Completed), plus AI message suggestions streamed to senders.
- Real-time inbox** via Server-Sent Events backed by **MongoDB change streams**; inbox analytics via an aggregation pipeline.
- Production infra: **idempotent append-only credit ledger** + per-user **AI quotas** (atomic Redis INCRBY), server-side rate limiting, an admin console (moderation, audit log, settings), full SEO (sitemap/robots/JSON-LD/OG image), and CI (lint → typecheck → test → build).

InsightBlog — AI-powered developer publishing platform

insightblog-one.vercel.app · GitHub

React 18 + Vite, TypeScript, Tailwind, TanStack Query, Chart.js · Hono + Prisma (Accelerate) + Neon Postgres on Cloudflare Workers · JWT, Zod · npm-workspaces monorepo

- Domain-driven serverless backend** delivered across 5 phases: JWT auth (access/refresh, RBAC, email verification), full blog lifecycle (draft / schedule / publish / version-history / categories / image upload), and a social graph (comments, likes, bookmarks, follow, notifications, recommendations).
-  **AI assistant** (Gemini, graceful mock fallback): improve-writing, SEO, cover & topic suggestions, and a **grounded engagement forecast** (heuristic over SEO/readability/history — not fabricated predictions).
- Multi-source **Trending Hub** and **author + admin analytics dashboards** with charts; shared Zod DTOs across client & server via npm workspaces.

SKILLS

Frontend

React.js, Next.js, Redux Toolkit, TanStack Query, Vue.js, TypeScript, JavaScript, MUI, Tailwind CSS, shadcn/ui, Vite

Backend

Node.js, Express.js, Hono, Cloudflare Workers, REST APIs, SSE, Socket.io, Zod, JWT / NextAuth, AWS S3

AI Integration

graceful fallback

Google Gemini, OpenAI (GPT), Vercel AI SDK · AI moderation, coaching & suggestions, prompt design, per-user quotas &

Databases & Caching

MongoDB / Mongoose (change streams), PostgreSQL / Neon, MySQL, Prisma, Redis / Upstash

Testing & Tooling

Vitest, Jest, Playwright, Testing Library, Git, ESLint, Prettier, CI/CD (GitHub Actions), pino

Engineering

Performance optimization, DB indexing & aggregation, caching, refactoring to layered/DDD architecture, security hardening

Soft Skills

Teamwork, problem-solving, remote collaboration, time management, proactiveness, quick learner

EDUCATION

B.Tech, Mechanical Engineering

Ganga Institute of Technology & Management (MDU)

Diploma, Mechanical Engineering

CRRIT, Kanjhawala (BTE)

CERTIFICATIONS

- Scholar Program — Masai School
- Basics of Web Development
- 100x Devs — Full Stack Web Development
